March job file - protect your home inside and out

Pest Control

Hortico's **NEW**, effective and easy-to-use pest control solution is perfect for both inside and outside the home.

This Do-It-Yourself Outdoor and Indoor Surface Spray kills ants, cockroaches, spiders, fleas, silverfish and clothes moths. It contains a low-toxic but highly effective combination of surface spray insecticides which control insects for up to **3 months!**

Suitable to use indoors on walls, in cupboards, behind sinks and other fittings as well as in entrances, on

carpets, skirting boards and under furniture. **Pets and children can return to the area once the solution is dry.**

Outdoors, Hortico's Surface Spray is equally effective when sprayed on walls, into crevices and around entrances. However, it is best to avoid application when rain is expected within 24 hours.

Soil Wetter

Hortico Soil Wetter Granules is available again - now in its new, distinctive orange container.

This water management solution contains a special blend of mineral granules and wetting agents that improve moisture penetration in water repellent soils and potting mix. Each mineral granule is infused with a wetting agent, which is released in small amounts during rainfall or watering to aid in water penetration. This gets the water to the roots and promotes plant survival during dry times.
